
Sneek Peak Documentation

Release 1.0

Kishore Vasan

December 29, 2016

Contents:

1 Indices and tables

3

Your personal security application that monitors the movement in front of the laptop using your webcam and saves the images of the change for future reference. It saves the images in your desktop under the folder name 'Sneak Peek'. This application requires OpenCV and numpy to be pre-installed for it to work.

Get things rolling with :

```
pip install git+git://github.com/kishorevasan/securityCamera.git
```

Install the necessary packages using

```
pip install numpy  
pip install opencv
```

Indices and tables

- `genindex`
- `modindex`
